

SUPER ERECTA SHELF®

Catheter Cart

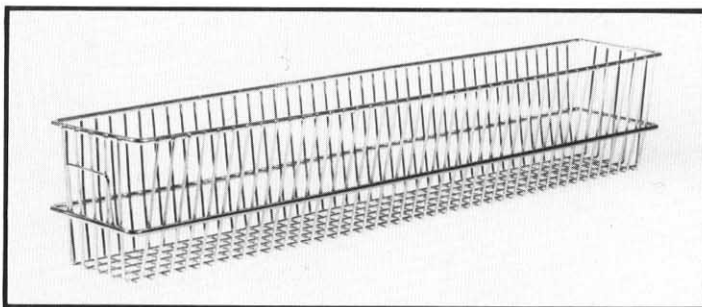

- Open Wire Design** provides greater visibility to help find cartons faster, check inventory more efficiently and eliminate opening cartons unnecessarily. Wire exhibits a clean, bright appearance and minimizes dust accumulation.
- Easy Shelf Adjustability:** Shelves can be adjusted at 1" (25mm) intervals along the entire length of the posts. So you can choose the shelf spacing that best suits the requirements for all catheter sizes.
- Fast, Secure Assembly:** The catheter cart, like all Super Erecta Shelf® units, can be assembled in minutes, without the use of any special tools and without sacrificing strength.
- Standard Unit** consists of nine shelves, 77 catheter baskets and 77 plastic bin markers for basket identification.
- Attractive Chrome-Plated Finish**

Catheter Basket

- A bright nickel plating gives this basket a neat, sanitary appearance. Made with a close mesh wire construction, it resists dents and bending and protects catheters from damage. Baskets nest for compact storage.
