Recessed Area with Tilt-Out Bins

Drawer

ADVANCED POLYMER DESIGN

METROFLEX™ ACCESSORIES

Advanced Polymer Design

MetroFlex[™] is constructed of an advanced polymer material that is solid and rugged, so it will endure tough challenges day in and day out. And because it will not rust, corrode, dent, flake, chip or peel, it will provide you with years of reliable service, and perform longer than any conventional metal cart.

- Flexible: The MetroFlex[™] system offers a complete line of overbridge, recessed, and drawer accessories that enable you to customize your cart to any specific need.
- Systems Oriented Approach: The MetroFlex[™] system allows you to buy into a system of cart shells, drawers and accessories that can be configured and reconfigured without tools, for any application throughout the hospital.
- Overbridge Accessories: The overbridge attaches to the back of the cart and holds a variety of accessories from hooks for general purposes, to sharps container holders, and label dispensers for more specific uses. Overbridge shelves attach quickly to hold monitors and other pieces of equipment.
- Recessed Storage Accessories: A recessed area on the side of the cart creates space to hold tilt-out bins, a wastebasket, gas cylinders, and an adjustable side shelf.
- Drawer Accessories: Drawer organizer kits, vial/ampule holders, and drawer label strips in six colors are available to make organization and identification easy.
- Field Upgradable: Accessories attach easily, so your cart can be changed to meet your needs at any time.
