1" (25mm) Ledge

- **1" (25mm) Shelf Ledges:** To prevent items from protruding or falling off shelves, ledges can be installed on the shelf edges.

In many cases a one-inch (25mm) ledge will serve the purpose, while allowing access to the shelf from all sides. When a higher ledge is needed, the four-inch (100mm) size can be used on the back or front of the shelf.

For enclosure of the entire back of a shelving unit, rods and tabs (below) can be attached.
